

## TECHNICAL DATA SHEETS

### DESCRIPTION

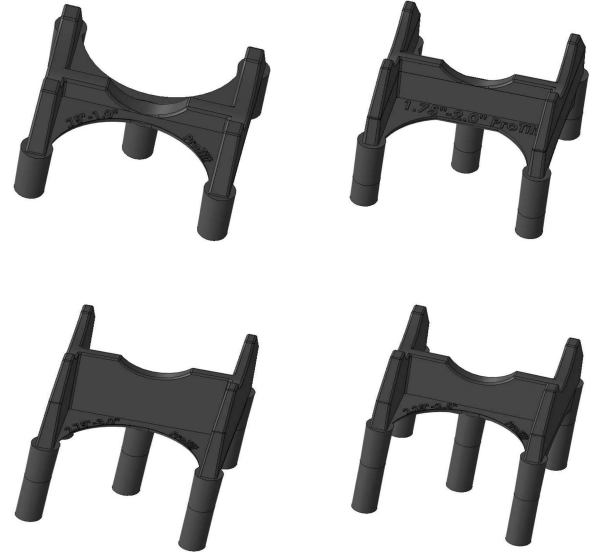

Our ProTilt Chairs range in size from 3/4" to 3", in quarter inch increments. Each size of the ProTilt Chair has two cover heights to reduce potential inventory storage requirements. The ProTilt Chair has an extra wide footprint which contributes to a more sturdy and heavy duty chair that stays in place better than lighter weight alternatives. The added support directly underneath the cradle provides for additional strength. The footprint borrows elements from our slab bolster providing a best case scenario for use on form-work, mud slabs, and tilt-slab applications.

### FEATURES

- Cover Heights from 3/4" to 3"
- Strong, easy to use.
- Accommodates Mesh to #11 bar

### APPLICATIONS

- Form-work
- Mud Slabs and Tilt Slabs
